

Salon iQ Stock app

We are very excited to announce Salon iQ's Stock app is now available on the app store.

Why use the Salon iQ app store?

1. Easily keep your stock up to date
2. Use your phone at any time to check your stock levels
3. Amend your stock levels using you phone
4. Perfect for salon owners/ managers to check stock quickly and easily
5. No need to log on to Salon iQ main system just use the app

On any iPhone or Android device go onto the app store and search for Salon iQ.

Once you have down loaded the app, open it up and enter your normal Salon iQ credentials that you use on the main system.

Then click on stock take to begin

You can manually search for the product or you can allow the Salon iQ app access to your camera and scan the product barcode. The app will automatically begin to search and find the product for you.

Product details will then appear on the next screen.

Here you can adjust stock levels where needed. You can see the minimum stock level that is already set on Salon iQ, there would be no need to change the minimum stock level each time you scan a product but can be done via the app if needed.

Please remember any changes you do make on the product details page you must press 'Update' for the changes to save.

'Update' = Save

To scan another product click on the 'Scan' button this will take you back to the camera screen for you to scan your next product.

To go back to the main menu click on small 3 lines on the top left hand side of the screen.
